

In your groups, you must recreate the following using effects in Adobe Audition 1.5. Each soundscape needs to be 1 minute in length. Each piece needs to make the listener feel like they are there. I want details. LOTS OF DETAILS. Be careful in layering audio with levels and making sure effects do not “pop” in and out. Make sure there is a constant in your soundscapes. Use sound effects and use the special effects in Adobe Audition 1.5 to help give “life” to your pieces (i.e. reverb, echo, delay)

1. Driving in a car in the rain.
2. A basketball game.
3. Walking through the woods.
4. Flying on plane
5. Walking through a “bad neighborhood.”

When you are through please email me the file as an mp3.

1 mp3 with all (5) soundscapes. Leave 5 seconds in between each for clarity.

Due Date:
