

Homemade Sounds & Story

In your groups of (3), complete the following in order:

#1 Create a story line/idea (keep it clean)

#2 Write a script for you story making note of the sounds you will need to record. Make sure you are able to record those sounds safely and unobtrusively. DO NOT MAKE A DISTURBANCE.

#3 Record your own effects and dialog for your story using the Zoom H2 recorder. Record them clearly without distortion. Allow enough time to return to class to save your sounds to your flash drive. I will not write passes if you are late to return. I can't save your sounds for you either. The SD cards will be wiped for other classes to use. You may bring in your own SD card to use if you wish. This works the same as a Flash Drive.

The length of this project should be NO LESS than 2:30 and no more than 3 minutes. The grading for this can be found as the standard rubric at enloeaudio.com. Make sure you are clear on how you are graded.

Please email me the completed project to: mrwhite@enloeaudio.com
