

To use the studio you must have a semester grade of a B or better in Audio In The Digital Age and individual mastery of the basic studio equipment modules. You also have to be on time to class and spend your time in class learning about studio equipment, rather than finding every reason to leave class. Lacking these requirements will redirect your continued attendance towards the following.

In your groups/or individually you are to create audio productions that will include:

- A voice over with your voice
- A script (with a clear idea and easy to follow)
- Use of sound effects
- A production length of 3 minutes
- An idea of your own
- Use Adobe Audition 1.5 to edit your production into an mp3 file emailed to production@enloeaudio.com . Make sure it is an mp3 and NOT a .SES. Check to be sure that you are sending what you wish to be graded.

Your projects will be due every week at the end of class on Friday and graded off the same rubric from Audio Production One. Your project will be classified as a studio project without using the studio.

Our studio equipment is very expensive and having:

- A semester grade of a B or better
- Showing up to class daily ON TIME
- Following ALL classroom rules
- Individual mastery of the studio equipment modules
- Remaining in class until the bell rings and staying in class during class

Demonstrates that you are trustworthy and focused to have the privilege of using the studio. Using the studio is a privilege and NOT a requirement.
