

I am treating this as a “real world” project. You are being contracted to produce a radio show to air on project90radio.com on a certain date and at a certain time. The criteria has been clearly listed what I am after. Not having the show produced correctly or not having it at all is failure in the “real world” and for this project. Take it seriously while having fun. Use your time wisely. Don’t wait on other members of your group to make you successful. **MAKE SURE YOU FILL OUT THE GROUP AGREEMENT.** You might need it.

I am listening for complete following of directions.

***Show order**

***Sound quality of the music and 100% clean edits. (Any cussing will give you an automatic Zero)**

***The content and delivery of your interview**

***The content and delivery of every talk break**

***The production of your show liner/sweeper**

*** Correct process for turning in your air check (MP3 emailed to production@enloeaudio.com)**

*** Full 30 minute show saved for later listening and usage.**

Grading will be (3) equal grades of the following

100 (All aspects done correctly and scholarly as listed above)

70 (Missing any one component of your production)

40 (Missing more than one component of your production)
