

HOW TO USE CUBASE 5

- #1 Double click on the Cubase 5 desktop icon
- #2 Let it run through the plug-ins and open
- #3 Choose “Empty” (This means you create the options)
- #4 Go to Devices and choose VST Connections
- #5 Under the INPUT TAB ONLY Choose 24 mono in from the drop down box. **DO NOT SELECT ANYTHING OTHER THAN THIS**
- #6 Now Close out of the VST Connections box
- #7 Now go to PROJECT and add TRACK
- #8 I typically select 8 tracks to record
- #9 The tracks load...now go to input tab on the left and assign them to the appropriate channel. Input#10 is the vocal booth
- #10 Click the monitor button to hear the mic. During playback take it off to hear the recording.

KEEP THE VOLUME LOW ON THE SPEAKERS. THEY COST \$1,600.00 AND I WISH NOT TO REPAIR THEM. DO NOT TOUCH OR PUSH ON THE SPEAKER CONES. THAT WILL DESTROY THEM.

DO NOT FIDGET WITH KNOBS, FADERS, OR ANYTHING. THIS STUFF IS MEGA \$\$\$!!!YOU + NERVOUS ENERGY WILL DESTROY THE EQUIPMENT.

NO GOOFING AROUND IN THE STUDIO.
