

Johnny Cash Peer Review Sheet

Have 2 peers look over your Johnny Cash Project to make sure it has the following for FULL credit. Look over it in Adobe Premiere and not the exported version. Changes might need to occur.

1. The Premiere Session is visible and saved in a folder
2. Song, "I've Been Everywhere" is playing in full length
3. The Volume is not distorting "peaking out"
4. Photos move to the lyrics of the song that represent the words being sung. Make sure the project "moves!"
5. The cities, towns, and states are represented with a street sign or some form of marking that clearly says the name. Ensure the photos match on time to the lyrics. Check the quality of the photos for pixilation!
6. Have your peer/producer export the project to their USB Drive for use in the next Objective, 106, Web Design. This will be an example of completed work.
