

Objective 103: Understanding Digital Animation:

You will find under the tab, Digital Media One Classwork & Review, Objective 103, Digital Graphics. This objective contains Power Points and terminology used to cover this objective. There are 3 sections 103.01, 103.02, & 103.3.

I would like for you to individually create a study guide using Quizlet at quizlet.com. Use pictures for each definition and term. This will be for a classwork grade, and it will also prepare you for the quiz/test on this objective. Please cover ALL THE TERMS and study over the Power Points as well. Create a link that I can see for full credit when quizlet asks you how to present your study guide. When you are complete, I will come around and have you show me your link and your study guide.

Step 1: Go to quizlet.com

Step 2: Create a FREE account (write down your p/w and take a pic)

Step 3: Begin creating your study guide

Step 4: Create a LINK that we can view to see your study guide

Step 5: Use your study guide to study for your upcoming quiz/test

The quiz requires you to LOGIN to your GOOGLE ACCOUNT to take it. You must score a 80 or above to be deemed proficient. The password to login in to: Digital Media One Classwork & Review is on the board. Once you enter it, you will more than likely not have to enter it again. Especially if using Google Chrome.
