

Photoshop Individual Project 2

Using old photos you have obtained, you are to create a photo collage with those photos. Use photo restoration techniques, cropping, color restoration, etc. You may scan them in with a scanner app you can download on your phone or use a scanner at home, a friend's house, etc. Save the photos on your Flash Drive or email for use. This project should show your culture and heritage if at all possible. Photos should be saved as a JPEG for easy import.

- At least 20 photos total
- Have text involved in your project
- Use the techniques listed above to correct original photo limitations
- Involve your culture and heritage
- Save your final product as a JPEG uploaded to CANVAS
