

## Sound Effects Project

In your groups, you are to use sound effects from our sound effects library to tell a story. We should be able to follow a progression from start to finish. The effects and the way you use them will convey a message. **DO NOT PLAY MORE THAN 8 SECONDS OF MUSIC AT A TIME. THIS IS NOT A MUSIC PROJECT.** Everyone in your group should know how to edit in Adobe Audition 1.5. This project should be saved to your flash drive while working. **DO NOT SAVE TO THE COMPUTER.** I clean the computers routinely. The final mp3 “mixdown” should be emailed to: [mrwhite@enloeaudio.com](mailto:mrwhite@enloeaudio.com). The length for the project is 3 minutes. This project will demonstrate to me the following:

#1 How do you work as a group?

#2 How do you work as an individual?

#3 How do you manage your time?

#4 Does EVERYONE in your group understand how to do basic editing?

#5 Do you know how to save your project to you flash drive?

#6 Do you know how to check your project for completion

#7 Do you know how to send in your project for grading?

#8 Can you follow basic directions?

### GRADING FOR THIS PROJECT

#1 Was the project on time? 50%

#2 Audio quality (time, consistency, levels, directions followed) 50%

(Total points: 100)
