

In your groups of 3, you are to create a NEW and UNIQUE superhero. You are to dazzle us with his/her super powers. You will need to record a voice over for this project. Listen to the example to get an idea.

You will need to:

#1 Write a script of what is said. There isn't any adlibbing

#2 Look through the sound effects to see how you will produce this.

#3 Make a time to record your group's voice overs

#4 PRACTICE out loud your voice overs. The project can only be as good as the voice acting.

The Project must be 2 minutes in length.

Everyone must edit their own version. A version will be selected from the group to playback during class for everyone to hear. The group will decide which of their projects will be submitted for playback.
